

BERJ GOKDAG | SCULPTURAL ATELIER

Capability Statement: Bespoke Hardware & Sculptural Objects

WHO WE ARE

We are a specialized independent atelier bridging the gap between avant-garde sculptural art and precision hardware design. We partner directly with luxury houses to translate complex visions into tactile, hand-finished metalwork, offering an agile and confidential infrastructure for small to mid-volume bespoke projects (50–500 units).

CORE CAPABILITIES

Digital Sculpting & Rapid Prototyping: Instead of rigid industrial CAD, we employ advanced digital sculpting for organic 3D modeling. This enables collaborative iteration and the rapid translation of concepts into physical prototypes to test weight, scale, and texture in record time.

The Sculptor's Expertise: We sculpt, rather than merely cast. Applying an artisanal brutalist aesthetic and mastery of micro-tolerances, we ensure every batch of modern luxury hardware undergoes rigorous hand-finishing without compromising complex geometries.

Material Integrity & Standards: We work in accordance with EU REACH guidance regarding restricted heavy metals. From lead-free eco-brass to sterling silver and solid gold, we guide partners toward the most appropriate metal bases and coatings for specific garment or skin-contact applications.

Confidentiality: Commissioned work is protected under NDA. Molds and project files are securely archived and never disclosed without authorization.

PRODUCTION SCOPE

Runway & Couture: Bespoke structural hardware and exclusive garment detailing.

VIP & Gala: Limited-edition sculptural gifts and event centerpieces.

Private Collections: Artisanal hardware for luxury packaging, bespoke leather goods, and premium textiles.

INITIATE A PROJECT

To request a private consultation or discuss timelines for an upcoming collection, please contact our studio. We aim to respond to qualified inquiries within 2–3 business days.
